CONTENTS

Energy separation in a vortex street. M. KUROSAKA, J. B. GERTZ, J. E. GRAHAM, J. R. GOODMAN, P. SUNDARAM, W. C. RINER, H. KURODA and W. L. HANKEY *page* 1

Transcritical two-layer flow over topography. W. K. MELVILLE and KARL R. HELFRICH 31

A boundary-layer analysis of Rayleigh–Bénard convection at large Rayleigh number. JAVIER JIMENEZ and JUAN A. ZUFIRIA 53

Coalescing of geostrophic vortices. R. W. GRIFFITHS and E. J. HOPFINGER 73

Reflection of a shallow-water soliton. Part 2. Numerical evaluation. N. SUGIMOTO, Y. KUSAKA and T. KAKUTANI 99

Microscopic flow near the surface of two-dimensional porous media. Part 2. Transverse flow. R. E. LARSON and J. J. L. HIGDON 119

Axisymmetrization and vorticity-gradient intensification of an isolated two-dimensional vortex through filamentation. M. V. MELANDER, J. C. MCWILLIAMS and N. J. ZABUSKY 137

Rayleigh–Taylor instability of fluid layers. G. R. BAKER, R. L. MCCRORY, C. P. VERDON and S. A. ORSZAG 161

On the linear stability of the inviscid Kármán vortex street. JAVIER JIMENEZ 177

Numerical simulations of nonlinear axisymmetric flows with a free surface. DOUGLAS G. DOMMERMUTH and DICK K. P. YUE 195

Bragg scattering of surface waves by periodic bars: theory and experiment. TETSU HARA and CHIANG C. MEI 221

Stokes flow down a wall into an infinite pool. ERIK B. HANSEN 243

A two-equation model for contaminant dispersion in natural streams. RONALD SMITH 257

On the reflection of a train of finite-amplitude internal waves from a uniform slope. S. A. THORPE 279

Vortex shedding behind a square cylinder in transonic flows. TAKEO NAKAGAWA 303

Three-dimensional steady streaming in a uniform tube with an oscillating elliptical cross-section. N. PADMANABHAN and T. J. PEDLEY 325

Numerical study of ribbon-induced transition in Blasius flow. PHILIPPE R. SPALART and KYUNG-SOO YANG 345

Compressible flow past a contour and stationary vortices. A. BARSONY-NAGY, J. ER-EL and S. YUNGSTER 367

Diffusion of matter by a non-buoyant plume in grid-generated turbulence. IKUO NAKAMURA, YASUHIKO SAKAI and MASAFUMI MIYATA 379

The wave structure of turbulent spots in plane Poiseuille flow. DAN S. HENNINGSON and P. HENRIK ALFREDSSON 405

Calculation of the effect of polymer additive in a converging flow. G. RYSKIN 423

Waves on a static water surface beneath a layer of moving air. I. H. GRUNDY and E. O. TUCK 441

On nonlinear K–l and K–ϵ models of turbulence. CHARLES G. SPEZIALE 459

The effects of turbulence on a separating and reattaching flow. YASUHARU NAKAMURA and SHIGEHIRA OZONO 477

Rolls versus squares in thermal convection of fluids with temperature-dependent viscosity. D. R. JENKINS 491

The flow in industrial cyclones. M. I. G. BLOOR and D. B. INGHAM 507

Dynamically consistent magnetic fields produced by differential rotation. D. R. FEARN and M. R. E. PROCTOR 521

The general solution for an ellipsoid in low-Reynolds-number flow. SANGTAE KIM and P. V. ARUNACHALAM 535

On the stability of a columnar vortex to disturbances with large azimuthal wavenumber: the lower neutral points. K. STEWARTSON and S. LEIBOVICH 549
